Browser Based Plug-in for Enhanced Image Display during Forensic Image Comparison

VIRTUAL STUDENT FEDERAL SERVICE

V S F S

Project Title	Browser Based Plug-in for Enhanced Image Display during Forensic Image Comparison
Project Summary	Support the National Counterterrorism Center and other intelligence or federal, state, local, or tribal law enforcement agencies to develop an unclassified web browser plug-in to facilitate the detailed forensic comparison of two images by human examiners.
Country	United States

Project Description

Interns will build a plug-in that will allow any two images displayed in a web browser page to be selected and transferred for display, comparison, and examination within a dedicated display which supports detailed comparisons for forensic examination of two images.
